High precision mould bases

BRU Y RUBIO offers a wide range of high quality components and services for the moulding such as, Mould Kits, Standard Components, P-Plates, Hot Runners and all ancillaries for injection mould tools.

Established in 1962, our aim is to assist our customers in improving their competitiveness in a global market.

We are currently present in Europe, South-Africa and South America. Our 50 years of experience with more than 10,000 customers confirms for the quality of our service.

Standard accessories

With over 50,000 items permanently available in stock, we can deliver in 24 hours anywhere in Europe giving an excellent service to our customers.

Bru y Rubio's customers are an essential part of our organization. Their feedback is taken into account in the day-to-day running and decision-making process.

Our aim is to offer the best value for money currently on offer worldwide.

At Bru y Rubio, we also fully machine Mould Plates according to our customer drawings and specifications.

We have a complete production line for this purpose so all machining is done in-house and nothing is subcontracted.

The benefits for our customers are:

- Full control and tracking of the work supplied
- Full control on delivery dates
- Full responsibility over the total process

Runnertech™ Hot Runner Solutions was created by Bru y Rubio after combining 50 years of experience in the Plastic Injection Moulding market, incorporating new product development, Engineering, Manufacturing and after sales Technical Service, along with the existing functions of distribution and sales.

Runnertech™ provides various solutions such as, Micro Moulding (components from 0.5 gms), Multi Cavity Solutions up to 64 dropsand, Sequential Valve Gate Systems,

RPS System (pre-assembled), and the Complete MB System (full hot half).

The result is a product with the highest level of reliability, proven by having more than 5000 systems running in over 10 Countries and 3 Continents.

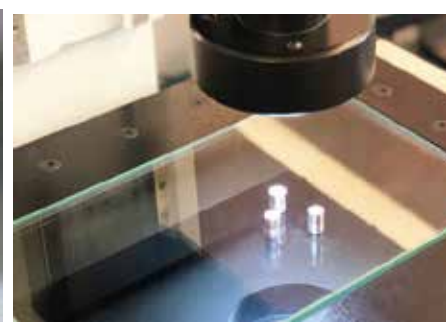

Our Commitment with Quality Excellence

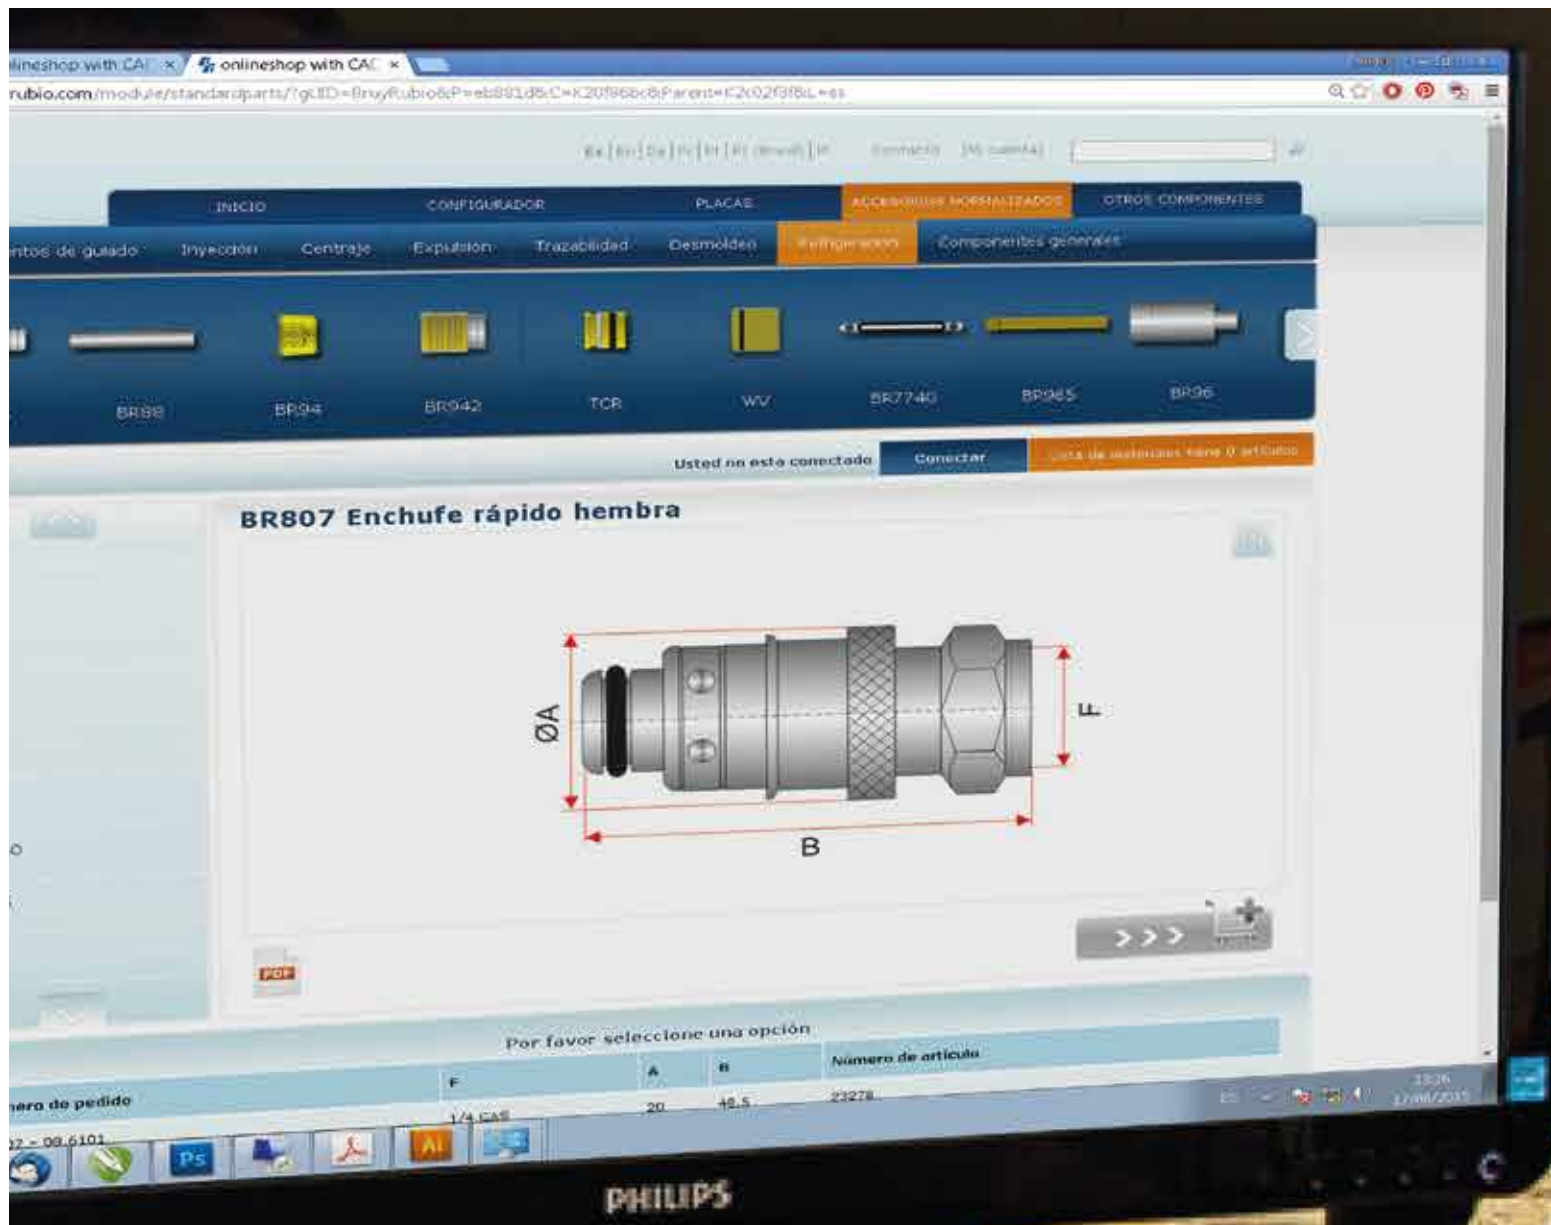

Bru y Rubio is committed to continuously improving our quality standards.

All of our plates have individual production codes and with this traceability data, we have issued a new and more detailed Quality Standards Certificate for steel.

This provides more information on the hardness and the composition of the steel used in the manufacturing of our plates.

Another tool implemented by Bru y Rubio is our 3D configurator.

This software is compatible with any CAD_CAM design program currently available on the market. It offers a 3D library containing all of our products.

With this tool the designer is able to import from our Library into his CAD program all of the elements he may need and combine them to achieve a 3D integrated design.

Configurator can be tested at www.bruyrubio.com by clicking on our "webshop".

Bru y Rubio's automated storage systems include WMS and vertical shelving system, enabling us to store up to 60.000 Kg net and reduce floor space.

Thanks to the Automated Storage system:

- Increased delivery speed by reduction of preparation time.
- Time saving on the picking process.
- Increased accuracy in the picking process.
- Product traceability.

International Exhibitions attendance

Given the international presence of Bru y Rubio, with our ongoing objective of expanding our activity in global markets, our customers can find us at the most important exhibitions for each of those markets.
